Developing Practical Prototypes

HealneX: Seamless Healthcare Innovation

Team: CodeX
Members: Ram, Nisarg
Hackathon: WIE HackX2025

Introduction & Overview

Hackathon Theme:

Reimagining healthcare accessibility and efficiency using technology.

Healthcare Innovation

POC & Demo

Stage 3 Objective:

Create and demonstrate a functional prototype that showcases your solution’s innovation and practicality, evaluated by industry experts during the AISYWLC Conference.

Problem Identification

Core challenges faced by patients and providers:

Limited Accessibility
Rural and underserved communities struggle to access care.

High Costs
Consultations and treatments remain unaffordable for many.

Trust Gap
Scepticism towards digital consultations impedes adoption.

Disconnected Records
Medical history scattered across multiple providers and systems.

Poor Continuity
Lack of follow-up and context results in suboptimal care.

Why It Matters

Patient Impact
Delayed diagnoses, fragmented care, and financial hardship.

Doctor Impact
Administrative burden, inefficient scheduling, and burnout.

Systemic Impact
Overburdened facilities, rising costs, and inequity.

Socio-Economic
Limited productivity and widening health disparities.

Health Divide

Millions remain disconnected from basic healthcare services. Bridging this divide yields individual and societal benefits.

Opportunities for Innovation

Unified Telehealth
One-stop virtual care connecting patients and providers seamlessly.

Smart Records
Secure digital records accessible across providers.

AI Insights
Personalised recommendations and health analytics.

Affordable Models
Low-cost consultation and transparent billing.

Integrated Communication
Video, voice & messaging in one platform.

Scalability & Reach
Deployable across regions and demographics.

Proposed Solution: HealneX

A unified digital healthcare platform that brings patients, doctors and administrators together under one roof.

Conceptual Design & Planning

Registration
Quick sign-up with OTP verification

Discover Doctors
Search & filter specialists

Book Appointment
Choose slot & pay online

Teleconsult
Video, voice & chat sessions

Upload Records
Securely store reports & history

Follow-up
Automated reminders & updates

A seamless journey from onboarding to follow-up: intuitive navigation, secure data management, and continuous care.

Key Features

User Roles
Patients, doctors & admins with tailored dashboards.

Easy Booking
Search, filter & schedule appointments instantly.

Secure Payments
Stripe integration for hassle-free transactions.

Medical Records
Upload, store & access reports anytime.

Notifications
Email/SMS reminders and updates.

Referrals & Rewards
Built-in incentives to grow the community.

Teleconsult & Chat
HD video, voice and real-time messaging.

Admin Control
Manage users, appointments & reports easily.

Innovation & Creativity

Hybrid Experience

Combines telehealth with unified digital records for continuous care.

AI-Powered Insights

Predictive analytics for personalised recommendations and alerts.

Engagement Loops

Referral & reward mechanisms to drive adoption.

Security & Trust

End-to-end encryption and transparent data policies.

Feasibility & Scalability

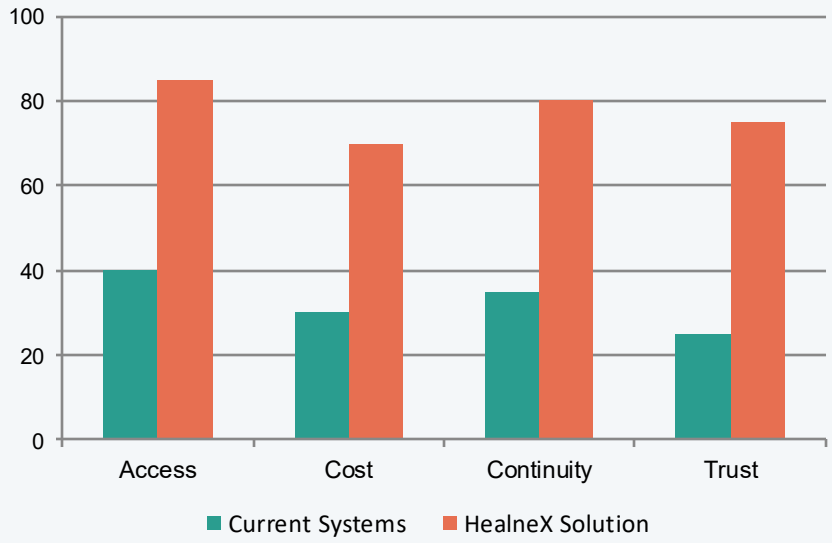
Feasibility

- Uses proven web & mobile technologies
- Integrates existing payment & messaging APIs
- Scalable microservices architecture

Scalability

- Modular design allows feature expansion
- Cloud-ready and multi-region deployment
- Adaptable to diverse regulations & languages

Impact & Benefits



Expected Benefits

- Improved access for remote populations
- Reduced healthcare costs via efficiency
- Better continuity leading to improved outcomes
- Increased trust through secure, transparent systems

Evaluation Criteria Alignment

Feasibility

- Built using proven technologies
- Integrates with existing systems

Innovation

- Unique combination of telehealth & smart records
- AI-driven recommendations & engagement

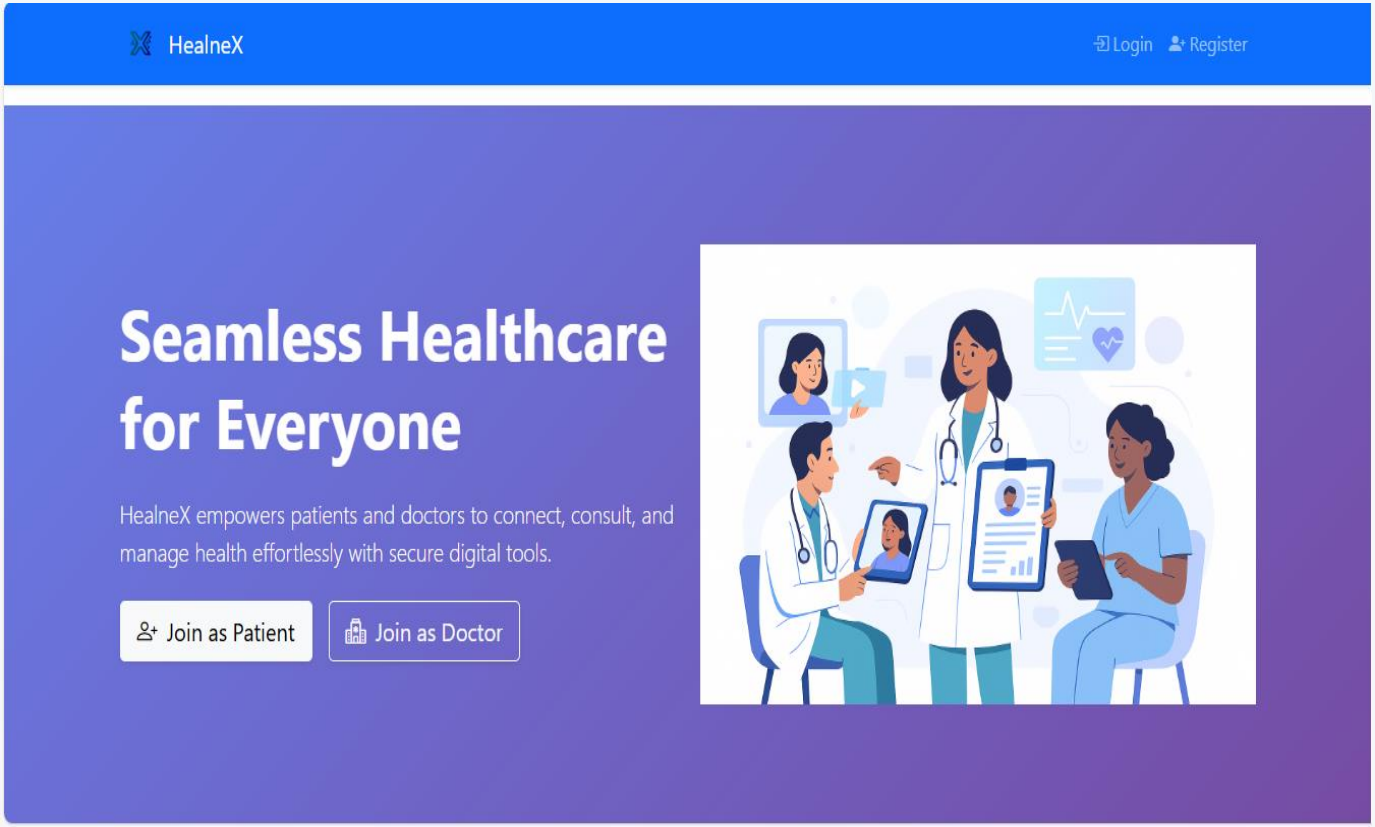
Scalability

- Modular architecture for expansion
- Multi-region support & localisation

Impact

- Bridges care gaps for millions
- Improves outcomes & efficiency

Demo & Prototype



Live Prototype

Explore the interactive prototype to experience the HealneX platform in action.

Conclusion & Next Steps

Summary

HealneX proposes a unified platform bridging care gaps, empowering patients and doctors, and streamlining the healthcare journey.

Next Steps

- Pilot programme with partner clinics
- Expand to rural & underserved regions
- Seek regulatory approvals & partnerships

Thank You!

Questions & Discussion

Thank you for your time and consideration.
